Summary

Product Design Manager with 10+ years in UX/UI, design systems and front-end development, focused on fintech (lending, investments and accounts). I led a team of 4 designers and now own a multi-brand design system in code. I build working prototypes with AI (Claude Code) to test ideas with real users before development, and I analyze the results with SQL and Python.

Work Experience

ku.bo.financiero – Product Design Manager

Mexico City | Aug 2023 – Present

- Own Calipso, a multi-brand design system in code (55 React components, web + React Native, CI checks).
- Built working prototypes with AI (React, Vercel) and field-tested a loan application flow with 4 advisors.
- Led discovery, prototyping and usability testing for lending and investment products.
- Managed and mentored a team of 4 product designers.

ku.bo.financiero – UI Lead

Mexico City | May 2022 – Aug 2023

- Defined the UI patterns and naming conventions shared by design and development.
- Standardized the UI across the web and mobile apps.

Gentera – UI Manager

Mexico City | Feb 2022 – May 2022

- Coordinated UI guidelines for digital initiatives.

Earlier experience: Nuxiba – UI Designer (2018–2022) · Applica2 – Motion Graphic Designer (2013–2018)

Education

- Le Wagon – Data Analytics Bootcamp (2025)
- Open and Distance University of Mexico (UnADM) – Bachelor's in Software Development Engineering (2021)
- National Autonomous University of Mexico (UNAM) – Bachelor's in Design and Visual Communication (2013)
